Big Pre-Expeller

Application:

This machine is suitable for the extraction of vegetable oils from such oil-bearing materials as rape seed, peanuts, sesame seed, etc. (The pressing worms can be replaced as required by the user for the purpose of the extraction of oils from some other oil-bearing materials, such as rice bran oil and the like.)

Feature:

1. All main parts of this machine such as worm shaft, pressing cage and other main parts are made of high -grade alloy steel through hardening treatment. so in spite of the conditions of high temperature and abrasion under which they work day and night, they keep durable for a considerable period.
2. The combination of steaming and roasting is also one of the features of this machine .It can be regulated in accordance with the different requirements of various oil-bearing materials for the temperatures before pressing so as to get high quality oil.
3. The whole process from feeding, steaming, roasting up to the discharge of oil and cake goes on automatically and continuously, so it is easy to operate the machine and save labors.
